

# IMPASSA DOOR REPLACEMENT

Open the door at a 90° angle as shown and maintain at 90° while performing the following steps.

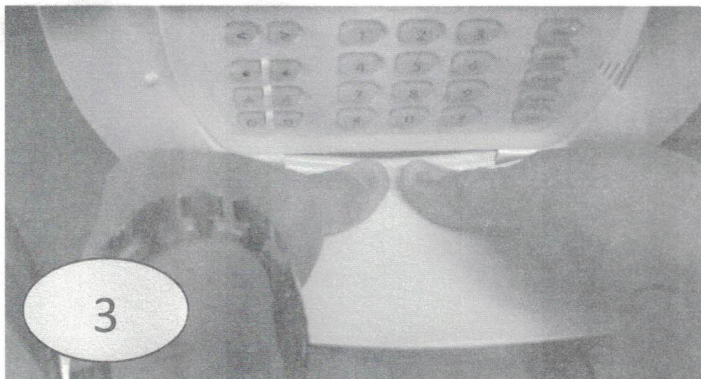

1

Stand above the unit to easily grasp the door with both hands and place thumbs in the middle of the door as shown.

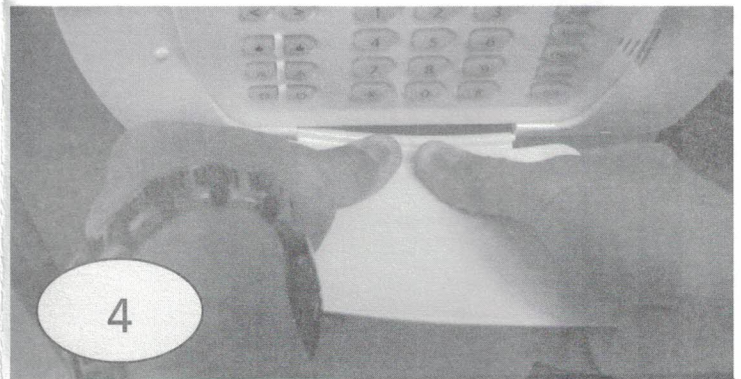

2

3

Bend the door by pushing downwards as shown.

4

Push down on either the right or left-hand side to unhinge one side of the door.

## Installation of a new door

To install a new door, perform the above steps in reverse order. The door should be installed at a 90° angle.
